

EDUCATION

Bachelor's Degree in Software Engineering - CGPA: 3.59 Addis Ababa Science and Technology University 	September 2019 – July 2024 Addis Ababa, Ethiopia
Relevant Coursework: Programming (C++), Object Oriented Programming (Java), Networking, Distributed Systems, Computer Security, Data Structures and Algorithms	
Data Structures and Algorithms Africa To Silicon Valley (A2SV) - Backed by Google 	October 2022 – August 2023 Addis Ababa, Ethiopia
- Completed an intensive two-year program: the first year focused on data structures and algorithms through solving complex problems, and the second year emphasized software engineering and system design. - Solved 700+  problems on LeetCode and Codeforces	

PROFESSIONAL EXPERIENCE

Full-Stack Engineer Yuba 	November 2025 – Present Addis Ababa, Ethiopia
- Built an AI-powered venture-building platform helping early-stage African founders validate problems, design value propositions, develop MVPs, and test market assumptions. - Developed multi-tenant organizational workflows, including invitations, RBAC, team management, onboarding, analytics dashboards, and credit allocation systems. - Engineered AI-driven research and problem discovery modules that improved founder validation efficiency by 65%. - Designed structured value proposition design systems that reduced value proposition creation time by 45%. - Implemented secure backend-integrated infrastructure with tenant-aware authorization, workspace isolation, and scalable organizational management features.	
Lead Full-Stack Developer Akil (by A2SV) 	December 2024 – October 2025 Addis Ababa, Ethiopia
- Led the technical architecture and development of Akil's web platform, ensuring scalability, performance, and security. Audited 37 route files and 150+ endpoints, implementing 38 concurrency optimizations, 9 bug fixes, and multiple caching/query improvements to reduce latency and strengthen API reliability. - Resolved and documented 90+ high-priority and 35+ moderate bugs on the web, improving system stability and reliability. - Cut page load time by 5 seconds and enhanced SEO by redesigning state management with server-side components and URL-based state handling. Upgraded legacy web applications and dependencies to current versions, addressing known security vulnerabilities and improving long-term stability. Owned the full development cycle for both backend services and web application; partnered with clients to refine requirements.	
UI / UX Designer & Web Developer Eskalate (by A2SV) 	October 2023 – November 2024 Addis Ababa, Ethiopia
Architected a scalable web dashboard and business account system, leading to a 25% increase in business user registrations. Accelerated web app performance by 50% through server-side rendering, decreasing TTFB from 1.6s to 0.8s. Deployed a centralized logging and monitoring pipeline on GCP, enabling error detection and alerting. Reduced issue resolution time by 50% through automated incident notifications. Delivered UI prototypes for 5+ new features, integrating feedback from 20+ beta testers to improve usability and reduce friction before launch. Fostered an inclusive team via 70+ code reviews and 10+ walkthroughs.	

SKILLS

Programming Languages: (Python, JavaScript, Typescript, Go) Frameworks and Tools: (Next.js, FastAPI, Tailwind CSS, NodeJS, Express.js, PostgreSQL, MongoDB, Figma, GitHub, GitLab, Notion, Docker, Google Cloud Platform (GCP), AWS, Jira, WebSockets, and CI/CD pipelines.) Core Skills: (Rapid Technical Upskilling (learned & deployed Next.js and FastAPI in production within a month). Team Enablement through Code Reviews, Pair Programming & Knowledge Sharing. Cross-Functional Communication with Designers, Product, and Engineering Leads)
--

ACHIEVEMENTS

Graduated Cum Laude – Ranked top in Software Engineering Department Third Place – AYuTe Africa Challenge Ethiopia for creating the digital platform AgriConsult, facilitating pre- and post-harvest scientific consultation.  Certified – Data Analysis with Python (freeCodeCamp).  Co-Founder – Software Engineering Association, AASTU; organized university tech event
